General feedback:

Too much in too little time again. Rather try to cover less to allow us to go deeper. Comfort breaks were ~~too~~ many. Any break is always longer than 5 min. Rather have 1 10 minute break than many short breaks.

General feedback:

This is a very important workshop that re-ignites the spark in learning & teaching. As educators we should challenge our ontology if we are to be effective in impacting learning. I really appreciate the content because it has allowed me to reflect on my own teaching philosophy. We need more of these workshops.

interesting topic which has challenged my thinking. I have a lot to consider for my modules. Time was just too short. Maybe consider a day-long session to effectively engage with content & practically start applying to my modules
